

TWIZZY Electric Tracking Vehicle Specifications – 2x Available

The 'Twizzy' Elite is our most compact electric powered tracking vehicle. It is fully electric meaning there is Zero Noise and Zero Emissions, making it ideal for filming sound as well as in indoor areas.

The Twizzy is capable of tracking at low speeds and up 80Kmh (50MPH). The independent Air Suspension can carry 3 crew members plus the precision driver (dependent on tracking sequence).

The Independent Air Suspension allows for a good payload for camera equipment/ small Jib arms and remote heads. It is driven from a centre position allowing the flexibility of camera mounting around the driver.

Its low line sight makes it unobtrusive and can be easily hidden in flowing traffic (Ideal for shooting plate shots).

It has scaffold rails that double as rigging points for camera and lighting, together with the multi drilled and threaded rigging plate. The Twizzy also comes standard with full all-round platforms extending the base of the vehicle when needed.

The Twizzy Elite was designed and built in house at Bickers using the latest Battery Technology. Additional mounts can be made upon request.

The Twizzy is also road registered for Public Highway use and driven by one of our Precision Drivers.

Standard Equipment	Optional Equipment
3 x Safety harnesses	Remote Head Mount / Post Rig
3 x Operator Seats with Lap Belts	Scaffold Rigging Kit
6x Front, Rear and Side Platforms	Camera Crane Mounting Kit
Dimensions / Weights
