

Air-Ride Combination Low-Loader

Air-Ride Combination Low Loader – Tracking Trailer

The air-ride combination low loader tracking trailer is towed by one of our 4x4 tracking vehicles and is suited for smaller hero cars, as well as some larger vehicles (contact our office for full list of compatible vehicles).

The suspension is 100% air cushion and can be adjusted according to weight and ride comfort, ensuring smooth and stable tracking performance.

For crew comfort, the combination low loader is fitted with a weatherproof and secure crew compartment with bench seating and safety harnesses for up to 6 crew members.

The vehicle is operated by one of our precision tracking drivers. When used as a tracking vehicle and low loader combination, a 2-person crew is required for operation and rigging.

Standard Equipment	Optional Equipment
