

Bickers Action Mad Max Front Camera Mount

The Mad Max Rig allows easy attachment of Camera and / or Remote head to front of any of our Camera Tracking Vehicles, not impairing the Camera Tracking drivers view, basically a Bumper Extension. it has been made with very smooth corners as the same way as a regular car bumper is, Pedestrian Friendly.

Ideally for POV(Front Facing Shots) filming in busy urban areas and has been used many times in Urban and Rural locations over the years. The reason this was made as a normal front filming platform has sharp corners and the overhang was more the 1m, The Mad Max Rig does not break any regulations for its use and has gained the approval for use in many cities. Police attendance is not required for its use.

We consider this a safe solution for filming from the front of a Tracking Vehicle.

It does not overhang the front of the Camera Tracking more 1m, so it does fall within the Overhanging Regulations as below . This is no different to a JCB Digger driving on the road.

Extract from regulations:

1. Loads overhanging the front or rear of the vehicle

The table below is a summary of the requirements applicable to front and rear overhanging loads set out in regulation 82(7) of the Road Vehicles (Construction and Use) Regulations 1986 (C&U), as amended.

Length of projection	Action if load projects rearwards	Action if load projects forwards
Not exceeding 1 metre	No requirements specified	No requirements specified

Mad Max Rig - 900mm Overhang
