

Cheyenne Elite Tracking Vehicle Specifications

The Cheyenne Elite is a 4x4 Multi-roll Tracking Vehicle. This vehicle can be used on all terrain as well as Off-Road. The Cheyenne Elite is fitted with Air Suspension which is adjustable to weight and ride comfort.

This vehicle can be used for all round camera tracking as well as "A" Framing and Tow Dolly with the interchangeable front and rear platforms. The generator (5 KW) is built in under the floor area of this vehicle allowing a larger area for crew / equipment. The carrying capacity on the rear work area of this vehicle is 6 crew plus equipment. The crew cab offers seating for a further 3 crew members and has space and mounting points for any remote head controls and monitors. The cab area also has 240v supply, 12v supply and USB sockets.

The safety rails double as rigging points and offer endless options for mounting cameras, remote heads, and other rigs. The Cheyenne can carry any Jib Arms and other manual cranes up to a Scorpio 23' or Techno 15' (Contact our office for full list of compatible cranes).

Driven by one of our Precision Tracking Vehicle Drivers.
