

Cheyenne Tracking Vehicle Specifications

The Cheyenne Tracking 4x4 is a multi-roll Tracking Vehicle. This vehicle can be used Off-Road on rough and muddy terrain, and is also ideal for location access with camera gear etc. Cheyenne is quiet and fitted with air cushion suspension, which is adjustable to weight and ride comfort.

This vehicle can be used for all round camera tracking and "A" framing with interchangeable front or rear platforms. The generator (5 KW) is built in under the floor area of this tracking vehicle allowing more area for crew / equipment and in addition is much quieter. The carrying capacity on the rear work area of this vehicle is for 6 crew, plus equipment. The Crew Cab offers seating for a further 3 crew members plus Driver and has space for remote head controls, the cab area also has 240v supply, 12v supply and USB sockets.

The safety rails double as rigging points and offer endless opportunity for hard mounting of cameras, remote heads and other rigs. The Cheyenne can carry any jib arm, other manual cranes and up to a 22 Foot Techno crane.

Driven by one of our Precision Tracking Vehicle Drivers.
