

## Dodge Ram Elite Tracking Vehicle Specification

The Dodge Ram Elite 4x4 Tracking Vehicle can be used for wide range of camera tracking. This vehicle can be used on and off-road making it suitable on all terrain. The Dodge Ram is fitted with Air Suspension which is adjustable to weight and ride comfort.

This vehicle can be used for all round camera tracking as well as "A" Framing and Tow Dolly with interchangeable front and rear platforms. The generator (5 KW) is built in under the floor area of the vehicle allowing more space for crew and equipment. The carrying capacity of this vehicle is 6 people and the crew cab offers seating for a further 3 crew members as well as remote head controls and monitors.

The safety rails double as rigging points and offer endless options for hard mounting cameras, remote heads, and other rigs. The Dodge can carry any Jib Arm and other cranes up to Techno 22' or Scorpio 23' (Contact our office for full list of compatible cranes).

Driven by one of our Precision Tracking Vehicle Drivers.
