

Petrol Trojan Elite

The Petrol Trojan is our high-speed compact tracking vehicle, based off our existing Trojan Elite Platform.

The Petrol Trojan is equipped with a 900cc Engine with a fully automatic transmission with the option of 2-wheel or 4-wheel drive. It has a maximum speed of 50mph with a high-speed acceleration.

The Petrol Trojan has fully adjustable Air-Suspension enabling it to have a higher payload for equipment including camera cranes and remote heads as well as carrying crew members. The Petrol Trojan is centre drive making it ideal for carrying a wide range of cranes including a Scorpio 10', GF-8 and many more (please contact our office for full list).

This vehicle is equipped with scaffold rails that double as rigging points for camera and lightning, as well as coming with complete platforms all round that can be adjusted to three different heights.

Due to its size the Petrol Trojan is our smallest and most powerful compact tracking vehicle. It is also fully registered for road use. And it is ideal for on and off-road use.

The Petrol Trojan can carry the precision driver plus 3 crew members and any camera equipment.
